SETTING OUR PURPOSE

This is Why We Do What We Do!

Students Who Are College and Career Ready in Reading, Writing, Speaking, Listening, and Language

READ To become college and career ready, you will read text of exceptional craft and thought whose range extends across genres, cultures, and centuries. Such works offer insight into human life and serve as models for thinking and writing. Through wide and deep reading of literature and literary nonfiction of increasing sophistication, you will gain a reservoir of literary and cultural knowledge, references, and images; the ability to evaluate arguments; and the capacity to understand the challenges posed by complex texts.

WRITE Writing is a way of asserting and defending claims, showing knowledge about a subject, and conveying what you have experienced, imagined, thought, and felt. To be a college- and career-ready writer, you will take task, purpose, and audience into careful consideration, choosing words, information, structures, and formats deliberately. You will learn to combine elements of different kinds of writing to produce complex and nuanced writing. You will use technology when creating, refining, and collaborating on writing. You will become adept at gathering information, evaluating sources, and citing material accurately, reporting findings from research and analysis of sources.

SPEAK and LISTEN To become college and career ready, you will have ample opportunities to take part in a variety of rich, structured conversations—as part of a whole class, in small groups, and with a partner—built around important content in various domains. You will be able to contribute appropriately to these conversations, to make comparisons and contrasts, and to analyze and synthesize a multitude of ideas. High school graduates depend heavily on their ability to listen attentively to others so that they are able to build on others’ ideas while expressing their own ideas clearly and persuasively.

LANGUAGE To be college and career ready in language, you will develop firm control over the conventions of standard English. You will come to appreciate that language is as at least as much a matter of craft as of rules and be able to choose words, syntax, and punctuation to express yourself and achieve particular functions and rhetorical effects. You will develop an extensive vocabulary, built through reading and study, enabling you to comprehend complex texts and engage in purposeful writing about and conversations around content. You will become skilled in determining or clarifying the meaning of words and phrases, choosing flexibly from an array of strategies. You will learn to see an individual word as part of a network of other words that have similar denotations but different connotations.

ICEE! Writing Strategy

- I** Main **Idea**: topic sentence that states “What do you think?”
- Introduce the topic. Do not use personal pronouns (he/she, him/her, etc.). If answering a question, rephrase the question into a sentence and give an answer.
 - Think in big, broad terms. Use specific examples in the evidence.
- C** **Cite**: “How do you know?”
- Introduce your source by giving credit; (think of this like tagging a picture!)
 - Title, Author, Date, Page
 - Introduce a quote or evidence; quotes and evidence cannot stand alone.
 - Give specific evidence: a direct quote, a paraphrase, or a detailed description of a picture or graph.
- E & E Explain and Elaborate**: Commentary sentences answer “So What,” or, “What does it mean?” Build upon the evidence; don’t repeat it. Analyze what the evidence means by asking the following questions:
- So what? How does this affect society and culture? What is the historical impact? How does this cause change? Why does it matter? How does this support my main idea?
 - Historical thinking skills:
 - **Context**: relate the evidence to its time period. What events or experiences led up to this? How will this affect the future? Why is this historically significant?
 - **Corroborate**: Does this source agree or disagree with other sources? Why?
 - **Source**: How reliable is this source? What do you know about the author? Does that change the meaning?
- !** **! Sum Up**: Concluding sentence brings it home!
- Tie the evidence and elaboration back to the main idea or thesis. How does it prove your point? This wraps it up with a finished feel.

MLA Citation Basics (Modern Language Association)

Top left of every paper:

- Source titles are *italicized*. They are not underlined nor in quotation marks.

There is a period after the evidence.

Citing the author:

- If the author is known, always use the author's last name:

- Wordsworth extensively explored the role of emotion in the creative process (263).

Quoting dialogue:

For electronic and Internet sources, follow these guidelines:

- Do not include URLs in the text; only provide partial URLs. For example: CNN.com or Forbes.com as opposed to writing out <http://www.cnn.com> or <http://www.forbes.com>.
- If there is no author, use a shortened version of the article title: “Living Planet,” or “A New Generation.”

There is NO punctuation or abbreviation in the parentheses unless you are citing multiple pages or a range of pages.

- Incorrect: (Smith, pg. 16)
- Correct: (Smith 16). (Smith 26, 32, 48). (Smith 30-35).
