Friday’s Fun Fact

The longest day of the year will be June 20th, 2021. It is called the Summer solstice. For roughly two months of the year – those months surrounding the summer solstice – Alaskans enjoy **daylight 24 hours** a day. For those two **hours** between sunrise and sunset, it's basically dusk or dawn because it never actually gets dark. This all-day **daylight** occurs from May 17 through July 27 in Fairbanks.
